

ELCITA

Ref: ELCITA NOTIFICATION/09/2020-21

Date: 18-09-2020

**Sub: Disposal of waste generated at your campus to ELCITA.**

ELCITA is working towards making Electronics city a model township with respect to waste management and other Sustainable activities.

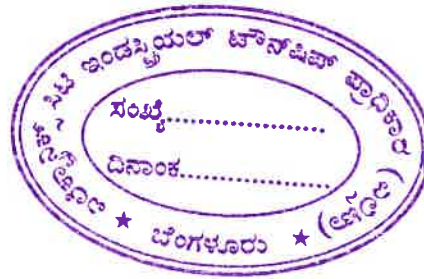

To make this a reality ELCITA has been running a waste management facility that manages waste responsibly collected from the member companies. The Waste segregation yard at No. 99, Doddathogur village and Organic Management facility at 8C Electronics City has the capacity to provide complete waste management solutions.

It is observed that some of the units / industries / shops / eateries / hotels are using unauthorized/unprofessional vendors to clear the waste generated in the premises. Further, it is noticed that many of these vendors do not have any facility to manage waste and are dumping the waste on the Lake bund or vacant plots in and around Electronics City. This kind of illegal dumping is causing adverse impact on the health of people and the environment. Such dumping depicts Electronics City in poor light and is against statutory compliances stipulated by pollution control board.

In view of this, ELCITA mandates all MSMEs, Shops, Hotels, Educational Institutions to handover the waste generated in their campus to ELCITA Waste Management Facility unless they have a professional waste management facility so that waste is managed the right way.

In case you need any clarifications please write to : [sust.mgr@elcita.in](mailto:sust.mgr@elcita.in) / 080 – 4660 2222

All companies are mandated to comply by 31/11/2020.
